UNITEX® UNI-SHAPE
ARCHITECTURAL PROFILES AND COLUMNS

Unitex® is the original Architectural Profile and Column manufactuer in Australia. And has been instrumental in providing Architects and Building Designers with quality façade design choices and innovation for over 25 years.

Why choose Unitex Architectural Profiles and Columns?

- Products are lightweight and can be installed to all modern surfaces as well as masonry
- Easy installation - suitable for Builders and Carpenters (i.e.
- mechanical and edge sealing etc)
- Custom-designed and features made to order
- Drawing and product design service
- Cost effective solution for heritage, renovation and also new projects
- Comprehensive Unitex installation manuals

Designers and Architects

- Complete range of Architectural façade and Columns
- Custom design and manufacture
- Samples of custom designs and stock products for your clients' approval
- Specialty designed to suit non-standard surfaces
- Longevity and durability (lightweight cement based mouldings will last the life of your building)
- In-house shop drawings and CAD drawings on request
- Suitable for heritage building projects
- Architectural representative available for all your enquiries

Builders

- Plan estimation and quoting service
- In-situ applied samples for approval prior to manufacture
- Site technical service to aid installers in specified procedures.
- Complete range of Architectural and Columns to suit all surfaces and designs
- Extensive applicator network
- Comprehensive Unitex installation manuals for correct cutting, drilling and installation
- Complete product range for correct installation (Packers, Fixings, Mastic, Backing material etc.)
- Complete colour range of Unitex Protective Top Coat (PTC)
- Complete render, texture and protective surface coating/paint system from one supplier for surrounding wall surfaces
- Insulating and high-build renders also available for surface levelling
- One warranty for complete system signed by Applicator and Unitex
- Technical site service to aid in selection of appropriate Unitex products for in-situ substrates

New Homeowner and Renovator

- Reputation - found on Australia's most exclusive and detailed projects
- Appearance - add appeal and value to your new home or renovation
- Recommendations of experienced Applicators of Unitex product range for your project
- On-site quotation service
- Samples
- Unitex product and Applicator installation warranty for peace of mind
- Unitex Sales & Customer Care staff are available for technical enquiries
- Reliability - 30 year defect-free product manufacturing history

Unitex recognise that fashions change and colour schemes evolve constantly. So systems and products can be readily updated and almost any colour matched.

Who is Unitex?

Unitex is proudly an Australian manufacturer, utilising local technology with our own in-house chemists, designing innovative products suitable for the Australian market. A family owned business, with the founding directors continuing to lead the company with innovative product lines.

Unitex is considered by Australia wide industry experts as the premier product coatings system for external façades. This has been achieved by a 30 year history of coatings, mouldings and insulation cladding (EIFS) for award winning commercial and housing projects nation wide.

Our customers value the technical on-site expertise of our in-house trained Technical Sales staff. Along with over 50 years knowledge and hands-on experience from the senior team, this know-how assures our customers of guaranteed class quality and service across the entire Unitex range.

Uni-Shape Window Mouldings – Overview

Uni-shape exterior Architectural profiles are made either solid or with a lightweight centre with a reinforced coating of pure resins and cementicious mineral components. Lightweight, factory made to offer our customers quality shapes to be of a superior finish and durability, and allow quick and easy installation.

Uni-Shape Window Profiles come in a light-grey cement colour and are acceptable as masonry features. They are to be surface coloured with Unitex Uni-PTC to suit decorative specifications.

Below are our standard Uni-Shape Window Mouldings. Unitex also provide custom designed, or bespoke, sizes and shapes to meet customer needs.

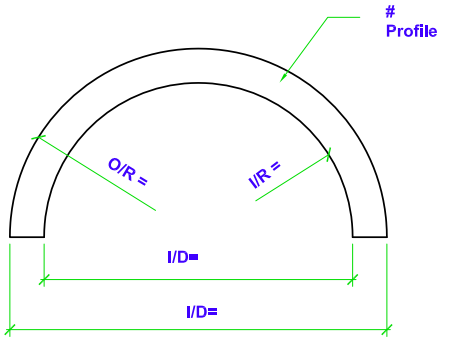
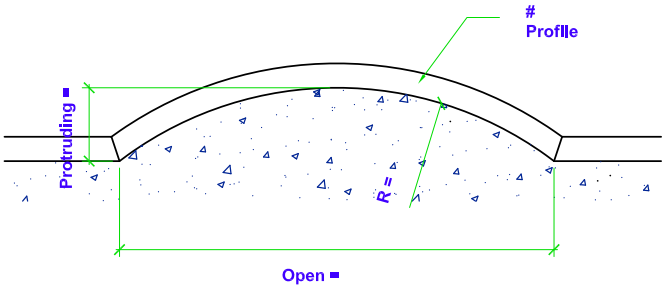
Custom-made or bespoke Arches, Arc's, Sweeps, and Window Sills with reveal

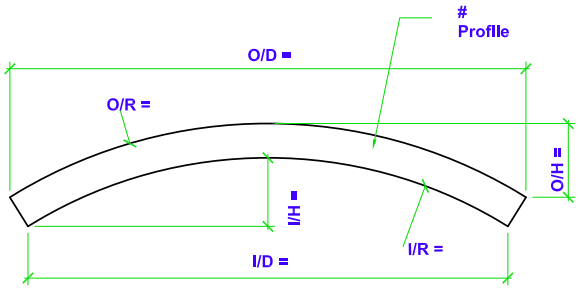
As the Australian market leader in bespoke architectural profiles and columns, Unitex offers you a simple guide (below) for how to measure and order these popular and highly sought after decorative features. Using this guide, carry out your site measure by simply filling in the blanks and email this with your request for quotation, or order, to Unitex (sales@unitex.com.au).



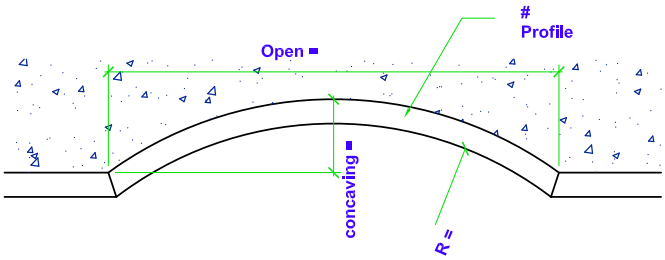
Arch (Semi-Circle)



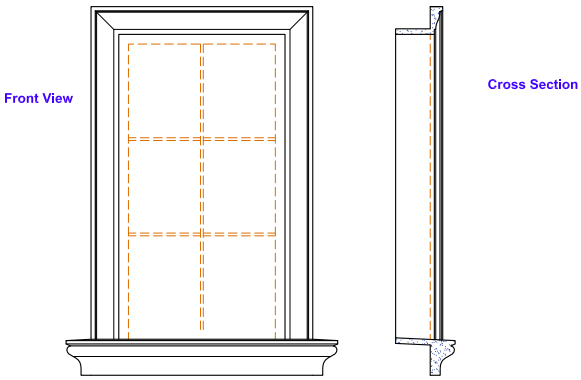
External Sweep (Plan View)



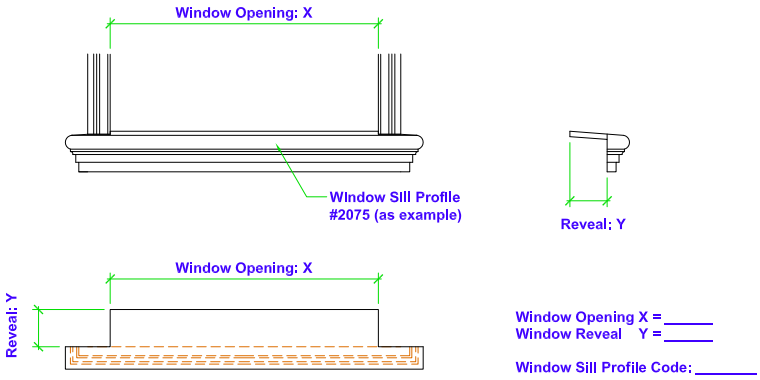
Arc



Internal Sweep (Plan View)



Pre-Assembled Window Reveal System



Note: For best result, also measure off onto a template and send to Unitex as further confirmation. As site situations can vary from plans. Templates can be fully cut and prepared from plywood, or measured on cardboard, and/or waterproof paper. Unitex will only manufacture from your provided measurements and templates.

Standard and bespoke Columns, Quoins, Wall & Fence features

Unitex Columns, Fencing and Wall Features are non-load bearing. Easy to assemble with all installation tools and accessories available at Unitex. The drawings below are just some of our Standard range. For a more comprehensive list, go online to www.unitex.com.au.

Product

As the Australian originator of this type of light-weight concrete product, Unitex has designed and perfected installation and fixing methods which must be followed to ensure longevity (refer to the Unitex Application and Fixing Guide). The fine detail that can be provided with the Unitex Uni-Shpae Mouldings and Columns, coupled with their ease of handling & installation, makes these Unitex products an Architect, Designer and Builder's first choice product.

Delivery

Unitex Standard Mouldings are supplied in 2.4 and/or 3m lengths and are supplied on 3.2m long Unitex specially designed pallets. For bespoke items of varying lengths, Unitex can re-design over length product to be supplied in manageable lengths and assembled on site.

Preferable site unload is via fork truck but can also be hand offloaded. Storage onsite is essential on concrete floor, or level ground, and to be left undisturbed until installation.

All Unitex fixings, patching, levelling accessories, and flexible mastics must be ordered and delivered with the Uni-Shape Mouldings and Columns to ensure your installer complies with the Unitex installation product guidelines.

For out of stock and bespoke Unitex Mouldings and Columns allow (in Summer months) 4-6 weeks for design, manufacture, drying and cement cure. In the Winter months, allow 6-8 weeks as a general rule of thumb.

Care for your Unitex Mouldings and Columns

After installation, Unitex Mouldings and Columns need to be painted to the colour of your choice using Unitex Uni-PTC. This will ensure uniform colour integrity and protection. As all moulded profiles project from the surface to which they are attached, in dusty conditions they can collect dirt, dust and grime from the atmosphere. If dirt and dust are left insitu they can become seed-beds for mould growth, so it is advised to bi-yearly hose down possible dust and dirt affected areas.

In such environments, Unitex advises Architects and Designers to specify moulds and sills with minimum 8-10^0 fall. This allows some self-cleaning (with rain).

Should your Unitex Mouldings and Columns be damaged from onsite abuse after installation they can be easily patched with Unitex Patching Compound (UPC200).

Customer Support

Unitex experienced Technical Sales Representatives are constantly advising at design stage and on site with our Builders and Installers. Most of the award winning and prestigious residences and commercial buildings throughout Australia are enhanced with Unitex Façade Mouldings and Columns.

Unitex in-house experienced CAD Design Specialist is seen as industry best practice and is an invaluable resource to the Unitex customer.

To contact the Unitex Technical Sales Representative and CAD Design Specialist please telephone Unitex on +61 (0)3 9768 4900 or email sales@unitex.com.au.
